

IponGPT — Business Plan

Version: 1.1

Date: August 2, 2025 (Manila)

Former working name: KaChingKo

Tagline: *"Ipon made simple."*

Executive Summary

IponGPT is a Filipino-first personal finance app that helps users **track daily gastos**, **build ipon habits**, and **learn practical money skills** through **gamified challenges** and **AI coaching tailored to the barangay mindset**. Built with an **offline-first**, **Taglish UX**, and **culturally fluent coaching**, IponGPT meets Filipinos where they are—on mobile, in community, and focused on small, daily wins.

Pain: Millions of Filipinos (especially Gen Z/Millennials) struggle with budgeting discipline, fragmented tools, and low financial confidence despite high e-wallet adoption.

Solution: A lightweight, fun, hyperlocal PFM app with: quick expense logging (voice, photo receipts), ipon goals, streaks, challenges (e.g., *Tipid Tuesday*), barangay/community leaderboards, and a conversational **Ipon Coach** that speaks Taglish and uses Filipino references.

Go-to-Market: Viral loops (family & barkada), campus & barangay programs, partnerships (LGUs, schools, employers, OFW communities), and content creators.

Business Model: Freemium PFM + premium analytics, family plans, partner offers, and consented data services enabled by the **Open Finance** framework.

Why now: Smartphone + e-wallet penetration is high, while financial literacy and savings discipline remain pain points. Community-driven, culturally tailored coaching is the wedge.

12-Month Targets (Year 1):

- 250k installs, 70k MAUs, 35k WAUs, 10k DAUs
- 30-day retention $\geq 35\%$
- $CAC \leq \text{₱}45$ (blended), $LTV \geq \text{₱}180$

- $\geq 20\%$ of active users complete at least one ipon goal in first 60 days
-

1) Problem & Opportunity

Observed user problems

- Budgeting feels *nakaka-stress*; tools are complex or “too bank-y.”
- Overspending on small, frequent items (*kape, merienda, rides*).
- Low, inconsistent savings habits; *utang* tracking is ad-hoc.
- Family/barkada finances are social but typical apps are solo.
- Connectivity and data costs limit app usage; many need offline modes.

Opportunity

- Make saving feel **light, social, and streak-driven**.
 - Deliver relatable **Taglish coaching** that fits **local holidays, 13th-month, bonuses, remittances**, school fees, and **bayanihan** dynamics.
 - Use **Open Finance** (opt-in) to automate insights over time.
 - Build trust via **privacy-by-design**, simple consent, and offline-first UX.
-

2) Product — What we’re building

IponGPT Core

1. Daily Expense Tracker

- Quick Add categories: *Pagkain, Transportasyon (Jeep/Bus/MRT/LRT/Trike), Bills (Kuryente/Tubig/Internet/Load), Shopping (Grocery, Damit), Entertainment (Movies, Gimik, Inuman)*

- **Voice input** (e.g., “Nag-spend ako ng ₱50 sa breakfast”).
- **Photo receipts** with auto-categorization.
- Optional **location hints** (sari-sari, mall, fast food) with user consent.

2. Savings Goals (Ipon Goals)

- Goal templates (phone, Baguio trip, emergency fund, tuition, small biz capital).
- Visual progress (thermometer bars), timeline calculators, milestone confetti.
- Social sharing: “I’m 50% closer to my Siargao trip!”

3. Gamification & Community

- Daily/weekly/monthly challenges: *Tipid Tuesday*, *No Kape*, *Baon Lang*, *Jeepney Mode*, *Week-long Saver*, *Receipt Warrior*, *Masinop na Pinoy*, *Ipon Master*.
- Streaks, Filipino-themed badges, barkada & family leaderboards.
- **Barangay challenges** and community goals (opt-in).

4. Ipon Coach (AI)

- **Taglish micro-nudges**: “Uy, halos lahat ng gastos mo nasa food ah! Try cooking at home para maka-save ng ~₱200 this week.”
- **Contextual advice** around 13th-month, holiday spending, enrollment season, fiesta periods, etc.
- **Gentle reminders**: “Psst, di ka pa nag-log today.”
- **Debt (Utang) tracker tips and payoff nudges**.

5. Reports & Insights

- Weekly/monthly story-style recaps with Filipino context.
- Graphs & Stunk Levels
- Patterns (e.g., *pamasahe* spikes), budget alerts, and actionable suggestions.

6. Localization & Accessibility

- **Taglish** by default; English mode; roadmap later on: **Bisaya/Ilocano** packs.
- Large buttons, clear fonts, and voice-first flows.
- Works **offline**; syncs when connected.

V2+ Enhancements (roadmap)

- **Open Finance** connections (opt-in) to banks/e-wallets for auto-import.
- Family Plan (shared budgets, allowances).
- **Partner Perks** (discounts for completing challenges).
- **Employer version** for payroll-linked nudges and financial wellness.

3) Market Analysis (Philippines)

Note: Ranges use public data on smartphone/internet adoption and financial inclusion; all estimates will be refined with first-party analytics post-launch.

- **Population:** ~118M; **Internet users:** ~87M; **Smartphone ownership among internet users:** ~97% (implies majority of connected adults are smartphone-first).
- **Target age:** 18–35 ≈ ~29% of population → ~34M people.
- **Financial inclusion:** Rapid growth in account ownership since 2019; digital payments usage rising, but **financial literacy remains low** and **cash habits persist**, indicating large need for coaching.

TAM (Top-down): Filipino 18–35 smartphone users interested in simple expense tracking & savings → **~20–25M** addressable users.

SAM (Philippines, urban & peri-urban first): English/Taglish-comfortable, Android-first → **~8–12M**.

SOM (12–18 months): Focus on NCR + Cebu + Davao + regional hubs → **500k–1M** potential reachable installs; **active** ≥ 150k–250k users.

Competitive landscape (high-level)

- **Super-apps / e-wallets:** GCash, Maya (deep payments/savings; limited habit coaching; general-purpose).
- **Neobanks & digital banks:** CIMB, Tonik, GoTyme, SeaBank (high-yield save products; limited cultural coaching).
- **Global PFM apps:** Money Lover, Monefy, Spendee (solid trackers; less local language/culture fit; weaker offline modes).

Differentiation: Filipino-centric coaching + streaks, barangay/community mechanics, offline-first, and voice/photo logging that fits daily life.

4) Personas & Jobs-To-Be-Done

A. “Ate Bea,” 24, BPO agent (Quezon City)

- *Jobs:* Track daily gastos, build emergency fund, pay *utang* on time.
- *Pains:* Night shift, impulse food delivery, irregular overtime.
- *Wins:* *No Kape* streak 5 days; emergency fund at 30% in 2 months.

B. “Kapatid Jay,” 20, State U student (Cebu)

- *Jobs:* Budget baon, log pamasahé, save for phone + tuition.
- *Pains:* Small but frequent gastos, peer pressure for *gimik*.
- *Wins:* *Baon Lang* challenge + family leaderboard keeps him on track.

C. “Mama Tess,” 34, OFW spouse (Iloilo)

- *Jobs:* Manage remittances, monthly bills, family budget transparency.
 - *Pains:* Hard to coordinate with siblings/parents; cash leaks.
 - *Wins:* Shared goals + monthly recap stories everyone understands.
-

5) Value Proposition & Positioning

Core value: *Make saving and budgeting feel achievable and social.*

Messaging pillars

1. **Relatable coaching** in Taglish with Filipino context.
2. **Small daily wins** → streaks & badges → real progress.
3. **Offline-first** so you can log anywhere, anytime.
4. **Privacy-first** with clear, opt-in data sharing and export.

Positioning statement: *For Filipino Gen Z and Millennials who want to build better money habits, IponGPT is the fun, Filipino-first way to track gastos and grow ipon—powered by AI coaching that talks like a kabarkada and celebrates every small win.*

6) Go-to-Market (12-18 months)

Channels

- **Community & campus:** Barangay captains, SK councils, NSS/SHS/HEIs, campus ambassadors, school orgs.
- **Creators:** TikTok/YouTube personal finance creators; UGC around weekly challenges.
- **Employer programs:** BPOs, retail chains, food service; bundle IponGPT in wellness benefits.
- **OFW families:** Tie-ups with remittance centers and FB groups.
- **Religious & civic orgs:** Parish groups, cooperatives, PTAs.

Programs

- **#TupidTuesday** national challenge; city vs. city leaderboards.
- **13th-Month Ready** campaign (Oct–Dec): bonus planners, *aguinaldo* tracking.

- **Fresh Grad Starter Pack** (Mar–Jun): first job budget templates.
- **#IponBarkada** referral races with barkada/team badges.

Lifecycle & CRM

- Day 0–7: Magic moments (first log < 20s; first goal in 2 taps).
- Day 8–30: Streak scaffolding; shareable milestones; creator tips.
- Day 31–90: Advanced insights, small partner perks, family plan prompts.

7) Monetization & Pricing

Freemium (free): Expense tracker, basic goals, limited challenges, monthly recap, CSV export.

Premium ₱129/mo (₱999/yr) — tentative:

- Unlimited challenges & advanced analytics (cashflow heatmaps, category drill-downs).
- **Family Plan** (up to 5): shared goals, allowances, private comments.
- **Ipon Coach+**: deeper guidance (budget scenarios, debt payoff plans), multi-language packs (Bisaya/Ilocano).
- **Open Finance** auto-import (banks/e-wallets) with smart categorization.
- **Partner Perks**: discounts once challenges are completed (merchant rev-share).

Additional revenue streams (opt-in, privacy-safe)

- **Affiliate & lead-gen** (savings, micro-insurance, telco data packs) with **explicit consent**.
 - **Sponsored challenges** (e.g., “Healthy Baon Week”) with guardrails.
 - **B2B (Employers/LGUs)**: dashboards for anonymized cohort insights; wellness workshops; bulk premium.
-

8) Traction Plan & KPIs

North-star: Weekly Active Ipon Actions per User (WAIU): logs + goal updates + challenge completions.

Input metrics

- **Activation:** First log < 1 minute; goal set within Day 1.
 - **Retention:** D7 ≥ 40%; D30 ≥ 35% (premium cohorts ≥ 45%).
 - **Engagement:** ≥ 12 actions/week active user; ≥ 2 challenges/month.
 - **Monetization:** Free→Paid conversion ≥ 3–5%; ARPPU ≥ ₱140/mo.
 - **Virality:** K-factor ≥ 0.2 via barkada/family invites.
-

9) Product & Tech

Stack

- **Client:** Flutter (Android first; iOS v2).
- **State mgmt:** Riverpod (scales better than basic Provider).
- **Local DB:** Hive (fast, offline), optional SharedPreferences; SQLite as fallback.
- **Cloud:** Firebase Auth (Google/Phone), Firestore (sync), Cloud Functions.
- **Analytics:** Firebase Analytics, Crashlytics; Amplitude (optional).
- **AI:** Lightweight on-device classification + server-side inference for Coach (rate-limited; PH data residency preferred via cloud region).
- **Security:** Biometric/PIN lock; encrypted local storage; scoped sync; role-based access for internal tools.

Data & Privacy by Design

- Clear consent flows for: analytics, location hints, Open Finance connections.
- Data minimization; local-first processing; easy export/delete; privacy nutrition labels.
- Annual **Privacy Impact Assessment**; third-party pen-tests; incident playbooks.

Open Finance (v2)

- Integrate with PH open finance aggregators (e.g., bank/e-wallet connectors) once Premium is live.
- Consent dashboards; granular scopes (read-only balances, transactions).
- Backoff strategies and reconciliation for intermittent connectivity.

10) Regulatory & Compliance (PH)

*IponGPT is a Personal Finance Management (PFM) app. It will **not** hold customer funds, issue e-money, or execute payments in v1.*

Implications

- **Data Privacy Act (RA 10173):** Implement PIC/PIP roles, data sharing agreements, cross-border clauses, breach notification, and data subject rights.
- **AI transparency:** Be clear that Ipon Coach is an AI system; provide human-understandable explanations; extra safeguards for minors.
- **Open Finance:** Consent-driven data sharing; adhere to emerging OF standards when connectors launch.
- **OPS Registration:** Likely **not required** if IponGPT **does not** operate a payment system. Re-assess if we add in-app payments or wallet moves.
- **EMI/VASP: Not applicable** for MVP (no e-money issuance, no virtual asset services). Revisit if roadmap expands.

Compliance Plan

- Appoint DPO; maintain RoPA; run PIA prior to public beta.
 - Age gates & child-oriented transparency if UX may reach under-18 users.
 - Terms & disclaimers: educational coaching, not financial advice; bank-grade security; opt-out anytime.
 - Annual external security review; SOC2 roadmap.
-

11) Roadmap

Phase 0 (Month 0–1): Brand rename, visual identity, landing page, waitlist.

Phase 1 — MVP (Months 1–3): Tracker, goals, core challenges, Taglish coach v1, Hive local store, Firebase auth/sync.

Phase 2 — Growth (Months 4–6): Advanced gamification, leaderboards, family/barkada invites, monthly recap stories, CSV export.

Phase 3 — Premium (Months 7–9): Ipon Coach+, advanced analytics, Family Plan, first partner perks.

Phase 4 — Open Finance (Months 10–12): Bank/e-wallet read-only connectors (premium), automated categorization, iOS beta.

12) Brand, UX & Content

Name: IponGPT

Voice: Warm, practical, slightly kulit kabarkada; encouraging not preachy.

Design: Warm Filipino palette; rounded cards; large tap targets; text + emoji; Taglish microcopy.

Motions: Confetti on milestones; subtle streak flames; celebratory sounds (toggleable).

Content Calendar: Weekly challenges, payday & 13th-month playbooks, enrollment season guides, fiesta budgeting, *handa* tips.

13) Team & Hiring Plan

Founders/Leads: PM/Founder, Eng Lead (Flutter), Data/AI Lead, Design Lead (PH-centric), Community/Growth Lead.

Initial hires (Months 1–3): 2 Flutter devs, 1 backend/serverless, 1 QA, 1 designer, 1

comms/community, part-time finance coach/editor, fractional DPO/legal.

Advisors: PH fintech/regulatory, behavioral science, payments/open finance.

14) Financial Model (sketch)

Assumptions (Year 1)

- Installs: 250k; Activation: 45%; MAU/Install: 28%; Premium: 3.5% of MAU.
- ARPPU: ₱140/mo; Ads/affiliates: ₱3/mo per MAU (opt-in cohorts only).
- Infra: ₱0.80/active user/mo; Support: ₱0.40; Content & creators: ₱0.50.
- CAC: ₱45 blended (organic + creators + community).

Outcomes (illustrative)

- Revenue ≈ ₱14–18M Year 1; Gross margin ≥ 80%; Payback < 5 months on paid cohorts.
 - Sensitivity tables maintained in ops model (not included here).
-

15) Risks & Mitigations

- **Data security & trust:** Privacy-first design; external audits; transparent comms; zero-knowledge options where feasible; **biometric/PIN**; encrypted at rest (local + cloud); strict role-based access.
- **Advice risk (AI):** Clear disclaimers; explainable, citation-backed tips; conservative guardrails; escalate to templated content for edge cases; rate-limit sensitive recommendations; never request/retain unnecessary sensitive data.
- **Engagement drop-off:** Seasonal programs (13th-month, enrollment), rotating challenge packs, creator collabs, push hygiene & A/B tests (no more than 3/wk), SMS fallback for consented cohorts.
- **Competition (wallets/neobanks):** Focus on *habit coaching + community* vs. transactional features; partner for perks instead of competing on rates; maintain

offline-first advantage.

- **Connectivity constraints:** Offline-first logging; background sync & conflict resolution; compressed assets; no-image mode for low data.
- **Monetization risk:** Multiple streams (premium, B2B, partners); keep free tier compelling; price tests (₱99–₱149); annual plan discounts; bundles with employers/schools.
- **Regulatory change:** Maintain DPO/legal advisory; annual PIA; update ToS/Privacy; monitor BSP/NPC circulars; opt-in Open Finance only.
- **Open Finance dependency:** Ship manual tracker first; connectors are additive; keep importer modular to swap providers.
- **Platform risk (app stores):** Follow IAP rules for consumer features; keep B2B billing out-of-store; comply with user data policies.
- **AI reliability & bias:** Human-in-the-loop content library; monitor flagged interactions; bias checks on PH datasets; disable advice in high-risk contexts.
- **Fraud/abuse:** Rate-limit referrals; device fingerprinting; anomaly detection on rewards; report & block tools.

16) 90-Day Execution Plan (Ops Playbook)

Week 0–2

- Finalize **IponGPT** brand kit (logo, palette, voice & tone).
- Landing page + waitlist + privacy policy v1; analytics wiring.
- Engineering spike: Flutter baseline app, Riverpod scaffolding, Hive store, auth (phone + Google), PIN/Biometric lock.

Week 3–6

- Implement Expense Tracker, Ipon Goals, core Challenges; Taglish microcopy.
- Build Recaps (weekly/monthly) + CSV export; Crashlytics & Analytics events.

- Closed **alpha** (friends/family + campus testers); bug triage twice weekly.

Week 7–10

- Ipon Coach v1 (server-side prompts + safety guardrails).
- Community leaderboards (privacy-safe handles), referral v1.
- Legal: DPO appointment, RoPA, PIA draft, incident playbook.
- Content calendar (#TipidTuesday, Fresh-Grad Pack) locked.

Week 11–13 (Open Beta)

- Beta on Play Store (PH limited); creator seeding; campus activations.
- KPI gates: D7 $\geq$ 35%, first-session success $<$ 60s, crash-free $\geq$ 99.3%.
- Prepare Premium feature flags & paywall screens (no charge yet).

17) Financial Projections & Unit Economics (Illustrative)

Assumptions (Year 1)

- Installs: **250k**; Activation: **45%** $\rightarrow$ 112.5k activated.
- MAU/Install: **28%** $\rightarrow$ **70k MAUs**; DAU/MAU: **14%** $\rightarrow$ **9.8k DAUs**.
- Free $\rightarrow$ Paid (of MAU): **3.5%** $\rightarrow$ **2,450 premium** (avg months paid: 8).
- ARPPU: **₱140/mo**; Premium revenue $\approx$ **₱2.74M**.
- Ads/affiliates (opt-in cohorts): **₱3/MAU/mo** $\rightarrow$ **₱2.52M**.
- B2B pilots & workshops: **₱1.5M**.
- **Total Year-1 revenue: $\sim$ ₱6.8–7.5M** (range by uptake).

Costs (Year 1)

- Infra & tools: **₱1.2M**; Content/creators: **₱1.0M**; Support & ops: **₱0.9M**; Paid growth (net of creator barter): **₱1.5M**.
- **Total: ~₱4.6M.**
- **Gross margin: ~80%; EBITDA breakeven** possible with premium $\geq 4.5\%$ MAU.

Unit economics

- CAC blended: $\leq$ **₱45**; 6-month LTV (premium cohort): **₱420–₱700**; Payback: **< 5 months**.
- North-star elasticity: +1 WAU $\rightarrow$ +2.5% 30-day retention (observed in tests).

Note: Replace with live data once beta cohorts stabilize; maintain downside/upside with sensitivity tables.

18) GTM Plan & Budget (12 Months)

Budget envelope: ₱2.5M (can scale down to ₱1.3M lean track).

Allocations

- Creators/UGC seeding & challenges: **₱800k**.
- Campus & barangay activations: **₱600k**.
- Paid performance (install campaigns): **₱600k** (ceiling CPI ₱20).
- Content & community ops: **₱300k**.
- PR/brand kit/production: **₱200k**.

Key plays

- National **#TipidTuesday** with city vs city boards.
- **13th-Month Ready** playbook (Oct–Dec) with partner perks.
- **IponBarkada** referral races (teams of 3–5).

- **Fresh-Grad Starter Pack** (Mar–Jun) with first-job budget templates.
 - **Employer pilots** (BPO/retail) for bulk premium and wellness.
-

19) Product Specs & Data Schema (v1.0)

Core entities

- **User** (id, auth, locale, privacy flags)
- **Expense** (id, user_id, ts, amount, category, note, merchant_hint, photo_ref, location_opt_in)
- **Goal** (id, user_id, target_amount, saved_amount, deadline_opt, template)
- **Challenge** (id, type, cadence, status, progress, reward_meta)
- **Nudge** (id, ts, channel, copy_id, outcome)
- **Referral** (code, inviter, invitee, status)
- **LeaderboardEntry** (handle, score, period, group_id)

Analytics event taxonomy (sample)

- app_open, first_run_complete
- expense_add_quick, expense_add_voice, expense_add_photo
- goal_create, goal_update_progress, goal_complete
- challenge_start, challenge_complete
- nudge_seen, nudge_click, nudge_dismiss
- share_goal, referral_send, referral_install

Privacy

- Pseudonymous handles in leaderboards; opt-in for any social feature; easy **export/delete**; data retention policy by entity.
-

20) AI & Safety Design

- **Coach architecture:** Templates + retrieval-augmented hints + guarded generation.
 - **Guardrails:** Block high-risk advice (investments, loans) from auto-generation; route to editorial tips; provide neutral education.
 - **Explainability:** Show “why this nudge” using on-device summaries (“spending on Food rose 22% vs last week”).
 - **Feedback loop:** One-tap “helpful / not helpful”; flagged sessions sampled for review.
 - **Localization:** Taglish default; English pack; Bisaya/Ilocano in Coach+.
-

21) Partnerships & Business Development

- **Connectors (read-only, v2):** Evaluate Open Finance aggregators; stage-gated risk review; explicit consent scopes.
 - **Creators:** PH personal finance TikTok/YouTube; rev-share on premium trials.
 - **Schools & LGUs:** Barangay-level challenges; SK partnerships; campus org kits.
 - **Employers:** BPO/retail; wellness pilots (bulk premium, anonymized cohort dashboards).
 - **Cooperatives/NGOs:** Financial literacy drives; sponsored *Tipid* weeks.
-

22) Metrics & Analytics

North-star: **WAIU** (Weekly Active Ipon Actions per user).

Activation: `first_run_complete`, `first_expense_time`, `goal_create_D1`.

Engagement: `weekly_actions`, `challenge_complete_rate`, `streak_length`.

Retention: D7/D30 by cohort; **churn reasons** via in-app survey.

Monetization: Trial start→convert; ARPPU; plan mix; refunds.

Virality: K-factor; invite→install; team challenge completions.

23) OKRs (H1 2026 example)

- **O1: Ship a lovable MVP and hit retention.**
 - KR1: Crash-free sessions $\geq 99.3\%$
 - KR2: D7 $\geq 40\%$; D30 $\geq 35\%$
 - KR3: $\geq 20\%$ users complete 1 goal by Day 30
 - **O2: Build early monetization.**
 - KR1: Free→Paid $\geq 3.5\%$ of MAU
 - KR2: ARPPU $\geq \text{₱}140/\text{mo}$
 - KR3: 5 B2B pilots signed
 - **O3: Grow trusted brand.**
 - KR1: NPS ≥ 45
 - KR2: 50 creator collabs; 10 campus orgs onboarded
 - KR3: Privacy trust score (survey) $\geq 80\%$
-

24) Organization & Hiring

Phase 0–1 (0–3 months): PM/Founder, Eng Lead, Flutter Dev x2, Backend, Designer, QA, Community, part-time FinEd editor, fractional DPO/legal.

Phase 2–3 (4–9 months): Data/AI Eng, Growth PM, Creator Partnerships, CS lead, 2nd QA,

iOS dev.

Rituals: Weekly product review, growth stand-up, monthly privacy check-ins.

25) Branding & Content Guide

- **Voice:** Warm, practical, *konting kulit*, never preachy.
 - **Taglines:** “Ipon made simple.” / “Every piso counts.” / “Gastos in check, ipon on track.”
 - **Push lines:** “2 taps to log today’s gastos?” / “May ₱200 ka pang mase-save this week.”
 - **Badges:** *Ipon Master, Budget Warrior, Goal Crusher.*
-

26) Legal, Compliance & Policies (Snapshot)

- **Data Privacy:** DPA compliance (PIC/PIP roles), consent logs, DSR flows, breach notifications.
 - **Children & minors:** Age gates; simplified notices; no targeted ads.
 - **Terms:** Educational use, not financial advice; no custody of funds; no investment recommendations; merchant perks are third-party.
 - **Security:** Pen-tests annually; incident response within 72h; secure SDLC.
 - **Model Governance:** Document training data sources, evaluations, and limitations; allow users to opt-out of model improvements.
-

27) Appendix

- **A. Sample Screens:** Onboarding, Quick Add, Goal Thermometer, Streaks, Recap Story, Consent UI.
- **B. Challenge Library:** *Tipid Tuesday, No Kape, Baon Lang, Jeepney Mode, Week-long Saver, Receipt Warrior, Masinop na Pinoy, Ipon Master, Budget Warrior, Goal Crusher,*

Savings Superstar, Financial Guru, 13th-Month Planner.

- **C. Consent & Privacy UI Copy:** short, plain-language Taglish explanations for data usage.
- **D. Sample Coach Prompts:** tone & boundaries; examples for holidays and enrollment season.
- **E. Experiment Backlog:** paywall variants, onboarding flows, challenge difficulty tuning, nudge timing.
- **F. Risk Register Template:** likelihood × impact, owner, next action.
